Maybe even better than free.

You can give this download link to your friends by mail or instant messenger. File is free to use with no gotchas and no hidden fees. The cost of that data transfer is covered by your internet service or the data plan on your phone. Simply upload your file and share the link. We have no file size limit. You don'tneed any special software installed to be able to download your files. Using file, you can circumvent those limits without paying to upgrade your team chatservice. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. Alternatively you canchoose to share your download links on blogs, forums and social networking sites. You can upload any type of file (movies, music, documents, images, zip filesand more). If only we could, we surely would! On the other hand, using file can actually save you money. Just upload the file you want to share with yourfriends and we send you a download link to your file. Keep your files private, or send your download links only to friends or family. Our service is completelyfree for everyone. So try our free and simple filehosting service now. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also,many team chat apps have limits to the size of files that can be transferred within their apps. No account or credit card is required to get started. filehostingprovides an easy possibility for you to send large files to your friends. There are no restrictions on the number of times a file can be downloaded. Any file inany format can be uploaded and downloaded for free. Unfortunately, we can't make that part free. Files can be downloaded from any computer from our highspeed servers. It is also allowed to link to the download page from websites and communities. This is easy, fast and reliable filehosting! You don't need anykind of premium-accounts. You decide who you want to share your files with. When you use file, you avoid storing the file you're sending in your cloudstorage or mail server. Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between yourcomputer or phone and our servers, then from our servers to your friends device.
